

SERVICE POLICY

To: Advanced Instruments Customers
From: Lisa Fahey, Vice President Global Marketing
Date: February 1, 2023
Subject: Service Policy

Advanced Instruments is committed to providing the highest level of service that customers have come to expect from our company. As part of this commitment, we want to take this opportunity to communicate our service policy.

As with many companies around the world, global supply chain challenges continue to limit the availability of parts and assemblies or make them no longer available for purchase. To ensure customer commitments are met throughout the product lifecycle with a high quality of service provided, we carefully manage replacement parts inventory and utilize highly trained personnel to perform service activity.

Under our service policy, one-year warranties and phone support are included for all new instruments. We also offer a variety of extended service options on all equipment that provide support through the instrument's serviceable life.

Advanced Instruments offers world-class service on all instruments less than 7 years of age*. We provide this coverage through a variety of service contract offerings, as well as billable service events. Based on current component availability, we have included a table with the service status of all instrument models. Despite careful management, this is subject to change based on supply change disruption.

We thank you for choosing Advanced Instruments as your laboratory supplier. To learn more about available service contract options, please visit our website at aicompanies.com/services or call 781-320-9000.

*Service is offered on Artel MVS® and PCS® instruments less than 10 years of age.
